

The Student Scientific Society (STN), also known as *Studenckie Towarzystwo Naukowe*, is a student-run organization at the Medical University of Gdańsk with over 50 years of history. STN is dedicated to supporting students in initiating and advancing scientific activities, providing platforms for collaboration, research, and academic development.

Our Mission: STN's mission is to cultivate research skills, promote academic excellence, and empower students to become future innovators in medicine, health sciences, pharmacy, and biotechnology.

We achieve this through:

- Offering platforms for students to present their work and receive constructive feedback.
- Organizing educational programs, workshops, and conferences that foster research and innovation.
- Encouraging collaboration among students from diverse health-related fields.
- Facilitating networking and dialogue between students and professionals to connect academic knowledge with real-world practice.

STN drives its mission through a variety of initiatives and projects, including:

- **International Student Scientific Conference** – Our flagship annual event attracting students from around the world.
- **Student Scientific Sessions** – Platforms for students to present and discuss their research.
- **STN Fair** – An event showcasing scientific opportunities and student research groups.
- **Workshops and Seminars**, including **“How to Science” Workshops** – Practical guidance for scientific development.
- **Databases of Student Research Clubs and Research Projects**
- **STUDNIA Project** – A comprehensive database of student research projects.

Why Join STN?:

- Connect with like-minded young scientists.
- Stay updated on the latest in science.
- Learn from experts and experienced mentors.
- Collaborate with skilled peers to advance scientific knowledge

STN represents student interests, funds student-led projects, and supports the organization of scientific events. The Society has been honored multiple times with the Red Rose Award, recognizing outstanding students and scientific groups in the Pomeranian Voivodeship.
